13th FP2020 Country Committee Meeting
Monday, 7 March 2016

Background

In the opening of the 4th ICFP that was held in Nusa Dua, Bali, Indonesia, Dr. Babatunde Osotimehin, who was representing the UN Secretary General, reiterated that the target of women and girls using modern contraceptive in 2015 could not be achieved because of the lack of commitment and funding crisis for family planning globally. “In 2015, an additional 24.4 million women and girls were using modern contraception in the 69 FP2020 focus countries. But that’s 10 million fewer than we had hoped to reach by this time. If we continue at this rate, we risk missing our goal--and leaving millions of women and girls without the care and services they need and deserve”. Many FP2020 partners, have already stepped up their support. But more is needed. Partnership is critical and progress in family planning is everybody’s business.

Following the conference, an FP2020 Asia regional workshop was organized by the FP2020 Secretariat. The workshop brought together government and donor focal points, technical experts, FP2020’s core convening organizations, including UNFPA, USAID and the Bill and Melinda Gates Foundation, and members of the FP2020 Secretariat to work together to develop “action plans” to accelerate progress in commitment countries, focusing on priority areas that are key to fulfilling FP2020 commitments.

The year 2016 is just started, and as the follow up of these two important occasions, the 13th FP2020 Country Committee meeting is a strategic platform to discuss priorities and further actions , to collaborate and coordinate activities, measure progress and hold each other mutually accountable to accelerate achievement of Indonesia’s FP2020 commitment.

Objectives of the Meeting

- To update report from the 4th International Conference on Family Planning
- To share the result of Asia regional FP2020 focal point meeting, and obtain input to the country action plan.
